TO WHOM IT MAY CONCERN

We are a busy interactive communication agency in downtown Toronto and recently we have increased our office with 17,000square feet of additional floor space. After evaluating a number of suitable suppliers, we selected Envirotech to provide all the furniture for the project due to the cost-effectiveness and meeting our firm's high standards for quality and appearance. The results are spectacular and we have received many compliments from clients and staff.

We found that the personnel from Envirotech worked very cooperatively with us during the design period and together with their team of installers worked cooperatively with the other trades on our site during installation. I would especially like to compliment the services that Ahmet Onder has provided to us; his insight and experience has resulted in substantial savings to our organization. His ideas and technical knowledge also made our use of space much more efficient.

I would have no hesitation to recommend Envirotech and would be pleased to provide additional references if desired.

Yours very truly,

Peter Cordy
Chairman
