Dear Sir/Madam:

Re: Office Reconfiguration Project

In 2004 URS carried out a major office renovation project at our premises in Markham, including redesign of fixed partitions, major kitchen overhaul and new carpets throughout, plus 117 new workstations and furniture for 29 offices.

We selected Envirotech to supply all the furniture for the project due to the cost-effectiveness and obvious environmental benefits associated with the refurbished furniture offered, while meeting our firm's standards for quality and appearance.

We found that the personnel from Envirotech worked very cooperatively with us during the design period, and together with its team of installers worked cooperatively with the other trades on our site during installation. Envirotech also honoured its commitment to working outside our normal business hours and having everything ready for our employees to start work on Monday mornings.

Our satisfaction with Envirotech is most evident in the fact that we have continued to purchase office furniture from it, including two expansions of 6-10 workstations each, which we have required since the original project.

Yours very truly,

URS Canada Inc.
