We're Your One Stop Shop So You Can Stay Focused On Running Your Business

Our experts can help specify solutions that work for your space, from the very latest trends in both new and remanufactured office furniture. Since we are both a manufacturer and a dealer of office furniture, we oversee every step of the process to ensure we get you what you want on time, and on budget.

We work with over 25 suppliers of new furniture, as well as remanufactured classics like Haworth, Herman Miller and Steelcase. Our focus on quality and design will ensure your office has the look and feel you're searching for.

We Love To Do Our Part

Wellness in the workplace is something we hold close to our heart at Envirotech. We are proud to be aligned with FitWel, LEED and the WELL Building Standard. Because of that, we are able to offer inspiring office products that help create happy, healthy and productive environments.

Sustainability Feels Good

When you think of sustainable furniture, you probably think of clunky, old, ugly furniture. Think again. Envirotech offers remanufactured furniture that looks better than new. With your new polished look, you can rest easy knowing that your purchase did not harm the environment. Here are a few stats on new vs. remanufactured office furniture that may sway you in the right direction:

- The Environmental Protection Agency estimates that businesses discard approximately 3,000,000 tons of furniture each year.
- Remanufacturing just 40 cubicles diverts one whole tractor-trailer load of furniture from a landfill. And a typical furniture product takes several hundred years to break down.

We can work with you to combine our new and remanufactured products so your project is completed on budget, and more importantly, without harming the environment.

Good Business Starts with Great People

Envirotech understands how valuable your people are to your business. Making a dynamic work environment is an important part of keeping your culture strong and your team motivated and productive.

We're Proud of the Company we Keep

We work with some of office furniture's top brands to bring you new options that fit every space. With over 25 new furniture suppliers, we ensure that the quality of each product surpasses your expectations and meets the specific design, style and colour scheme you're looking for.

Bring Insight Into Your Office Space

A – Reception

The reception area is usually a customer's first exposure to your company and it should reflect your culture whether it's a separate entrance or a unit in an open concept environment.

B – Workstations

Most office spaces need different types of workstations – including private, open concept, ergonomic and sit-stand solutions to ensure every employee has a workstation that best suits their role.

C – Conference Rooms

This is where the big stuff happens in most businesses so comfort and varying degrees of privacy are of utmost importance.

D – Executive Suites

Sometimes it just doesn't make sense to have the whole office as open concept and private suites are needed for closed door conversations and leadership roles.

E – Collaborative Areas

Integrating collaborative areas in your office helps bring people together to share ideas, innovate and do great work.

F – Cafés

Having an area where people can eat together and connect fosters a more collaborative culture vs people feeling they have to work through lunch at their desks.

Have You Considered the Value of Remanufactured Office Furniture?

With an inventory of thousands of remanufactured products, we have what you need to revitalize your space with a new look and feel. We refurbish top brands like Haworth, Herman Miller and Steelcase to give classic, high-end furniture a new look at a fraction of the price.

Workstations

Workstations should be customizable to both the individual and the office environment. That's why Envirotech offers remanufactured workstation solutions that can be personalized in terms of number of pods, sizes, colours, fabrics and panel heights.

Seating

Different functional areas require significantly different styles of chairs, stools and lounge furniture. With a variety of conference, side and task chair seating options to choose from, Envirotech's remanufactured solutions can elevate your design without breaking the budget.

We're More Than Just Office Furniture

Envirotech is with you for every step of your office redesign, from interpreting the initial floor plan, to full service delivery and installation. Whatever space you want to create, Envirotech works with you to bring your vision to life.

Planning and Design Layout

We'll help you maximize your space without sacrificing function. Starting with a visualization tool, we help you lay out your floor plan. Then we'll work with you to build your office interior, select fabrics and finishes and add any custom touches you need.

Project Management

Our job is to make your project as seamless as possible from start to finish. Envirotech will take care of everything, from working with your team of architects, designers and real-estate professionals, to coordinating and overseeing deliveries and installations.

Delivery and Installation

Let our experienced installers do the work for you. Our team of installation experts has significant knowledge of all the product lines we carry, so they can have your office set up in no time—all across North America.

What Can You Do With Your Current Furniture?

Let us take care of this for you! We can help:

- Sell your used furniture with the support of one of our account managers.
- Leverage our large network of account managers to ensure you get the best price.
- Donate the furniture to a not-for-profit organization for reuse.
- Disassemble, sort and recycle parts and pieces of furniture to off-set labour costs.

When you partner with Envirotech we work with you to help you remove old furniture from your office space in an environmentally conscious way.
